

# switching on the light: complementary treatments for learning difficulties with Aman Kanwar

This workshop looks at the range of complementary treatments available for Learning Difficulties.

In the first half of the workshop a framework is presented in order to help you understand what these treatments aim to do and why they work. In the second half of the workshop Aman will talk about Colourpuncture and demonstrate some Colourpuncture treatments for Learning Difficulties.

The workshop will be of interest to both health professionals and the general public who have to deal with Learning Difficulties either firsthand or secondhand.

Aman Kanwar's expertise lies in diagnosing and treating functional weaknesses in the various organs and systems of your body. This approach can be particularly useful in treating Learning Difficulties where the reasons that cause the difficulties can be complex and not easily pinpointed.

Colourpuncture addresses the electromagnetic aspect of our body. Electromagnetic waves of specific wavelengths within the visible spectrum are applied to specific reflex points in the body to produce a healing effect. This is a non-invasive therapy and can achieve remarkable results in the treatment of both acute and chronic symptoms. It can also be used to treat weaknesses that we are genetically pre-disposed to.

Saturday 29th November

3.00 – 5.00pm
